VL522F-FC IP LED Text Sign w/Speaker and Flashers

The Valcom VL522F-FC LED IP Text Sign with Speaker and Flashers is built with two LED signs designed to display information in both directions. The VL522 provides audible and visual alerts to individuals within your facility notifying them of important information. It is ideal for hallways and common areas for K12 schools, hospitals, higher education facilities, manufacturing and industrial plants and areas where broadcasting a visual and audio message is preferred.

The LED IP Text Sign with Speaker and Flashers is a multi-functional device that can be used as a clock, paging system, talk-back speaker, and display messages or flashers for emergency alerts or important information in your organization.

Benefits

ADA compliant

Keep your facility in compliance with ADA regulations

Send Messages Quickly

External button capable for call switch, emergency call, or lockdown confirmation

Activation Options

Speaker output, LED display and flashers can be activated together or separately
