

# Bi-Directional Horn

Valcom's V-1050C 5-Watt Bi-Directional Horn is designed with dual opposing horns that allows you to position them to a specific area so a voice page is broadcast in both directions. The V-1050C is a one-way amplified horn assembly that is mounted on a common frame giving you flexibility to rotate and move up or down in areas where people are moving through, such as long narrow hallways, corridors, warehouses, parking lots and loading docks are able to hear broadcast notifications.

Self-contained amplifier  
and volume control
