

Paging Expanders

Valcom's V-1095 70V Paging Expander allows you to expand a centrally amplified system using Valcom one-way speaker/amplifier assemblies. With the V-1095 you can easily expand your 25/70/100V paging system without adding additional amplifiers.

Valcom's V-1094A/V-2994-W Page Port Preamp/Expanders are a solid state audio amplifier that expands the number of Valcom amplified speakers on a zone. The page port preamp/expander will interface 600-ohm type page ports to up to 150 Valcom amplified speakers or expand the number of Valcom amplified speakers on a zone by 150.
