

SoundMasking™ Speaker

Valcom's Spot SoundMasking™ Speaker allows you to create a curtain of audible noise that aids in masking conversations that can be easily overheard. Our Spot SoundMasking Speaker is an inexpensive approach for healthcare facilities, government agencies, financial institutions, clergy, counselors, human resources and attorneys. The speaker is easily installed and works as both sound source and amplifier, so no additional equipment is necessary.

The Spot SoundMasking Speaker is separate from your overall communication system, so when a page is required, the sound coming from the speaker isn't interrupted, and helps you remain compliant with the HIPPA in healthcare settings and uphold confidentiality in office settings.
