WALL/POLE MOUNT – INTERACTIVE VOICE COMMUNICATION UNIT

The **CB 4-r** is our basic communication unit designed for wall or pole installations in interior and exterior applications. The all-steel housing and Code Blue's speakerphone system meet the need for a highly vandal resistant unit while providing a cost effective and reliable solution.

The low power consumption, LED-lit faceplate illuminates the exclusive analog InterAct and VoIP speakerphones designed for maximum reliability, vandal resistance, auxiliary functions, mass notification control, and fault monitoring and reporting capability. They lead the market in system programming flexibility. The optional remote mount combination LED beacon/strobe kit allows the user flexibility throughout the job.

The **CB 4-r** is a good choice for dorm and building entrances, hallways and transit centers.
